

## Frame.focus() method

This method fetches an element with `selector` and focuses it.

**Signature:**

```
focus(selector: string): Promise<void>;
```

### Parameters

Parameter	Type	Description
selector	string	the selector for the element to focus. If there are multiple elements, the first will be focused.

**Returns:**

Promise<void>

### Remarks

If there's no element matching `selector`, the method throws an error.
