

## Gatsby basic form Functions example

This example shows how to build a form with react-hook-form that submits to a Gatsby Function.

### 1. Start developing.

To get started clone this repo locally and run `npm install` to add all necessary packages.

```
cd examples/functions-basic-form
npm install
npm run develop
```

### 2. Open the code and start customizing!

Your site is now running at `http://localhost:8000!` You can use the UI on the index page to test the functions or directly access them at `http://localhost:8000/api/form`

Try editing the function in `src/api/form.ts` or form at `src/pages/index.js`

### 3. Deploy

You can deploy this example on Gatsby Cloud by copying the example into a new repo and connecting that to Gatsby Cloud.
