

Gatsby basic form Functions example

This example shows how to build a form with [react-hook-form](#) that submits to a Gatsby Function.

1. Start developing.

To get started clone this repo locally and run `npm install` to add all necessary packages.

```
cd examples/functions-basic-form
npm install
npm run develop
```

2. Open the code and start customizing!

Your site is now running at <http://localhost:8000>! You can use the UI on the index page to test the functions or directly access them at <http://localhost:8000/api/form>

Try editing the function in `src/api/form.ts` or form at `src/pages/index.js`

3. Deploy

You can deploy this example on Gatsby Cloud by copying the example into a new repo and [connecting that to Gatsby Cloud](#).
