

Change Log

Changes for 0.15.1+ can now be found in <https://github.com/typicode/json-server/releases>

0.15.0 - 2019-05-21

- **Breaking** Require Node 8
- Upgrade dependencies
- Reduce package size

0.14.2 - 2018-12-26

- Fix `db.getState` is not a function

0.14.1 - 2018-12-25

- Show error message if port is already used
- Upgrade to `lowdb` 1.0

0.14.0 - 2018-06-09

- Listen to `localhost` by default, instead of `0.0.0.0`

0.13.0 - 2018-05-30

- Bundle all index page assets so that you access it without network connection
- Drop Node 4 support

0.12.2 - 2018-04-26

- Add `_delay` query parameter
- Upgrade `please-upgrade-node` dependency

0.12.1 - 2017-11-02

- Disable logging for static content requests
- Remove bad `console.log`
- Update dependencies
- Use `nanoid`

0.12.0 - 2017-08-02

Re-include `body-parser` in `jsonServer.defaults()`

If you're using JSON Server in an Express server and experience issues, you can disable it by passing

```
jsonServer.defaults({ bodyParser: false })
```

0.11.2 - 2017-07-10

Fix engines field in package.json

0.11.1 - 2017-07-10

Add please-upgrade-node

0.11.0 - 2017-07-05

Switch to express-urlrewrite to support rewriting query parameters (e.g. /articles?id=1 # → /posts/1)

If you're rewriting default routes, you'll need to update your routes.json file (see add custom routes for updated doc).

0.10.3 - 2017-06-28

- Fix line-break error in CLI

0.10.2 - 2017-06-28

- Add --foreignKeySuffix option (e.g. snake case post_id) #556 #570

0.10.1 - 2017-05-16

- Multiple fields sorting GET /posts?_sort=user,views&_order=desc,asc

0.10.0 - 2017-04-26

- **Drop Node v0.12 support**
- Prevent TypeError when a filter is applied on a null value #510

0.9.6 - 2017-03-08

- Update index page
- Improve performances (lowdb v0.15)
- Add Location header to newly created resources #473

0.9.5 - 2017-02-11

- Display custom routes on homepage
- Fix duplicate query params error #352

0.9.4 - 2016-12-08

- Improve rewriter #431
- Improve watch mode #427

0.9.3 - 2016-12-07

- Fix #396 PUT/PATCH saves the updated item with an id that has been converted to string

0.9.2 - 2016-11-29

- Fix #221 nohup support
- Fix #420 TypeError when watching `db.json`

0.9.1 - 2016-11-21

- Fix
- #412
- #451

0.9.0 - 2016-11-11

- Shorter `uuid`
- No automatic conversion of strings to boolean or integer
- Create a default `db.json` file if it doesn't exist
- Fix
 - #361
 - #363 #365
 - #374
 - #383
- Updated dependencies and codebase to ES6

0.8.23 - 2016-11-03

- Fix `Links` header

0.8.22 - 2016-10-04

- Fix `Links` header issue when using `_page`
- Add query params support to the route rewriter

0.8.21 - 2016-09-13

- Fix `bodyParser` issue when using custom routes

0.8.20 - 2016-09-12

- Fix #355
- Add `_page` support

0.8.19 - 2016-08-18

- Fix #341

0.8.18 - 2016-08-17

- Add CLI option `--middlewares` and support them in `json-server.json` config file

0.8.17 - 2016-07-25

- Fix snapshot creation for JS files (ex: `json-server generator.js`)

0.8.16 - 2016-07-11

- Support `x-www-form-urlencoded`

0.8.15 - 2016-07-03

- Bug fix: `--watch` option on OS X

0.8.14 - 2016-05-15

- Bug fix: data wasn't written to file in v0.8.13 and v0.8.12

0.8.13 - 2016-05-12

- Make `_like` operator case insensitive

0.8.12 - 2016-05-08

- Minor bug fix

0.8.11 - 2016-05-08

- Support sort by nested field (e.g. `_sort=author.name`)
- Fix `graceful-fs` warning

0.8.10 - 2016-04-18

- CLI option `-ng/--no-gzip` to disable `gzip` compression

0.8.9 - 2016-03-17

- CLI can now read options from `json-server.json` if present
- CLI option `-c/--config` to point to a different configuration file

0.8.8 - 2016-02-13

Fixed

- Fix #233

0.8.7 - 2016-01-22

Added

- gzip compression to improve performances
- CLI option `-nc/--no-cors` to disable CORS

0.8.6 - 2016-01-07

Added

- CLI option `-ro/--read-only` to allow only GET requests

0.8.5 - 2015-12-28

Fixed

- Fix #177

0.8.4 - 2015-12-13

Added

- Like operator GET `/posts?title_like=json` (accepts RegExp)

0.8.3 - 2015-11-25

Added

- CLI option `-q/--quiet`
- Nested route POST `/posts/1/comments`
- Not equal operator GET `/posts?id_ne=1`

0.8.2 - 2015-10-15

Added

- CLI option `-S/--snapshots` to set a custom snapshots directory.

Fixed

- Fix plural resources: DELETE should return 404 if resource doesn't exist.

0.8.1 - 2015-10-06

Fixed

- Fix plural resources: PUT should replace resource instead of updating properties.
- Fix singular resources: POST, PUT, PATCH should not convert resource properties.

0.8.0 - 2015-09-21

Changed

- `jsonServer.defaults` is now a function and can take an object. If you're using the project as a module, you need to update your code:

```
// Before
jsonServer.defaults
// After
jsonServer.defaults()
jsonServer.defaults({ static: '/some/path' })
```

- Automatically ignore unknown query parameters.

```
# Before
GET /posts?author=typicode&foo=bar # []
# After
GET /posts?author=typicode&foo=bar # [{...}, {...}]
```

Added

- CLI option for setting a custom static files directory.

```
json-server --static some/path
```

0.7.28 - 2015-09-09

```
# Support range
GET /products?price_gte=50&price_lte=100
```

0.7.27 - 2015-09-02

Added

```
# Support OR
GET /posts?id=1&id2
GET /posts?category=javascript&category=html
```

0.7.26 - 2015-09-01

Added

Support embed and expand in lists

GET /posts?embed=comments

GET /posts?expand=user
