

Recoil Example

This example shows how to integrate Recoil in Next.js.

[Recoil](#) is an experimental set of utilities for state management with React used by some teams at Facebook. This example takes the code from the [redux examples](#) and demonstrates how it would be implemented with Recoil.

Deploy your own

Deploy the example using [Vercel](#) or preview live with [StackBlitz](#)

How to use

Execute `create-next-app` with [npm](#) or [Yarn](#) to bootstrap the example:

```
npx create-next-app --example with-recoil with-recoil-app
# or
yarn create next-app --example with-recoil with-recoil-app
# or
pnpm create next-app -- --example with-recoil with-recoil-app
```

Deploy it to the cloud with [Vercel](#) ([Documentation](#)).
