

Next.js + Reflexjs Example

Reflexjs is a library for rapid UI development with style props, color modes, themes and variants.

This example shows how to use [Reflexjs](#) with Next.js.

Deploy your own

Deploy the example using [Vercel](#) or preview live with [StackBlitz](#)

How to use

Execute `create-next-app` with [npm](#) or [Yarn](#) to bootstrap the example:

```
npx create-next-app --example with-reflexjs with-reflexjs-app
# or
yarn create next-app --example with-reflexjs with-reflexjs-app
# or
pnpm create next-app -- --example with-reflexjs with-reflexjs-app
```

Deploy it to the cloud with [Vercel](#) ([Documentation](#)).
