

Code for Roformer.

Run with

```
DATA_PATH=???  
OUTPUT_DIR=???  
python3 train.py \  
    --experiment=roformer/pretraining \  
    --config_file=experiments/roformer_base.yaml \  
    --  
params_override="task.validation_data.input_path=${DATA_PATH},runtime.distribution_str:\  
\  
    --tpu=local \  
    --model_dir=${OUTPUT_DIR} \  
    --mode=train_and_eval
```
