

Private items cannot be publicly re-exported. This error indicates that you attempted to `pub use` a type or value that was not itself public.

Erroneous code example:

```
mod a {  
    fn foo() {}  
  
    mod a {  
        pub use super::foo; // error!  
    }  
}
```

The solution to this problem is to ensure that the items that you are re-exporting are themselves marked with `pub`:

```
mod a {  
    pub fn foo() {} // ok!  
  
    mod a {  
        pub use super::foo;  
    }  
}
```

See the [Use Declarations](#) section of the reference for more information on this topic.
