

Python Language Services

Python provides a number of modules to assist in working with the Python language. These modules support tokenizing, parsing, syntax analysis, bytecode disassembly, and various other facilities.

These modules include:

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\cpython-main\Doc\library\[cpython-main] [Doc] [library] language.rst, line 14)

Unknown directive type "toctree".

```
.. toctree::

    ast.rst
    symtable.rst
    token.rst
    keyword.rst
    tokenize.rst
    tabnanny.rst
    pycclbr.rst
    py_compile.rst
    compileall.rst
    dis.rst
    pickletools.rst
```
