

zh-CN

通过 `rowSelection.selections` 自定义选择项，默认不显示下拉选项，设为 `true` 时显示默认选择项。

en-US

Use `rowSelection.selections` custom selections, default no select dropdown, show default selections via setting to `true`.

```
import { Table } from 'antd';

const columns = [
  {
    title: 'Name',
    dataIndex: 'name',
  },
  {
    title: 'Age',
    dataIndex: 'age',
  },
  {
    title: 'Address',
    dataIndex: 'address',
  },
];

const data = [];
for (let i = 0; i < 46; i++) {
  data.push({
    key: i,
    name: `Edward King ${i}`,
    age: 32,
    address: `London, Park Lane no. ${i}`,
  });
}

class App extends React.Component {
  state = {
    selectedRowKeys: [], // Check here to configure the default column
  };

  onSelectChange = selectedRowKeys => {
    console.log('selectedRowKeys changed: ', selectedRowKeys);
    this.setState({ selectedRowKeys });
  };

  render() {
    const { selectedRowKeys } = this.state;
    const rowSelection = {
      selectedRowKeys,
      onChange: this.onSelectChange,
    };
  }
}
```

```

selections: [
  Table.SELECTION_ALL,
  Table.SELECTION_INVERT,
  Table.SELECTION_NONE,
  {
    key: 'odd',
    text: 'Select Odd Row',
    onSelect: changableRowKeys => {
      let newSelectedRowKeys = [];
      newSelectedRowKeys = changableRowKeys.filter((key, index) => {
        if (index % 2 !== 0) {
          return false;
        }
        return true;
      });
      this.setState({ selectedRowKeys: newSelectedRowKeys });
    },
  },
  {
    key: 'even',
    text: 'Select Even Row',
    onSelect: changableRowKeys => {
      let newSelectedRowKeys = [];
      newSelectedRowKeys = changableRowKeys.filter((key, index) => {
        if (index % 2 !== 0) {
          return true;
        }
        return false;
      });
      this.setState({ selectedRowKeys: newSelectedRowKeys });
    },
  },
],
};
return <Table rowSelection={rowSelection} columns={columns} dataSource={data}
/>;
}
}

export default () => <App />;

```
