

zh-CN

幽灵按钮将按钮的内容反色，背景变为透明，常用在有色背景上。

en-US

`ghost` property will make button's background transparent, it is commonly used in colored background.

```
import { Button } from 'antd';

export default () => (
  <div className="site-button-ghost-wrapper">
    <Button type="primary" ghost>
      Primary
    </Button>
    <Button ghost>Default</Button>
    <Button type="dashed" ghost>
      Dashed
    </Button>
    <Button type="primary" danger ghost>
      Danger
    </Button>
  </div>
);
```

```
.site-button-ghost-wrapper {
  padding: 26px 16px 16px;
  background: rgb(190, 200, 200);
}
```
