

## Steps to publish a new version of monaco-editor-core

### Generate monaco.d.ts

- The `monaco.d.ts` is now automatically generated when running `gulp watch`

### Bump version

- increase version in `build/monaco/package.json`

### Generate npm contents for monaco-editor-core

- Be sure to have all changes committed **and pushed to the remote**
- (the generated files contain the HEAD sha and that should be available on the remote)
- run `gulp editor-distro`

### Publish

- `cd out-monaco-editor-core`
- `npm publish`
