

Change the alignment of elements with the [vertical-alignment](#) utilities. Please note that vertical-align only affects inline, inline-block, inline-table, and table cell elements.

Choose from `.align-baseline`, `.align-top`, `.align-middle`, `.align-bottom`, `.align-text-bottom`, and `.align-text-top` as needed.

To vertically center non-inline content (like `<div>` s and more), use our [flex box utilities]({{< docsref "/utilities/flex#align-items" >}}).

With inline elements:

{{< example >}} baseline top middle bottom text-top text-bottom {{< /example >}}

With table cells:

{{< example >}}

baseline	top	middle	bottom	text-top	text-bottom
----------	-----	--------	--------	----------	-------------

{{< /example >}}

Sass

Utilities API

Vertical align utilities are declared in our utilities API in `scss/_utilities.scss`. [Learn how to use the utilities API.]({{< docsref "/utilities/api#using-the-api" >}})
