Gatsby is a modern framework for blazing fast websites. This repository is our monorepo for managing all the great GatsbyJS starters for the community.

What's a starter?

A starter is a simplified example to get up and running with Gatsby quickly and easily. These starters are directly integrated with the Gatsby Command Line Interface (CLI).

Official Starters

Name	Demo	Description
blog	gatsby-starter-blog-demo.netlify.app	A starter for a blog powered by Gatsby and Markdown
default	gatsby-starter-default-demo.netlify.app	A simple starter to get up and developing quickly with Gatsby
blog-theme-core		Starter for the official Gatsby blog core theme
blog-theme		Starter for the official Gatsby blog theme
mdx-basic		Gatsby starter MDX basic.
minimal		A Gatsby starter with no plugins and a single welcome page.
notes-theme		Starter for the official Gatsby notes theme
theme-workspace		Starter for creating a Gatsby Theme workspace
theme		Starter for the official Gatsby blog and notes themes.

hello-world	gatsby-starter-hello-world-demo.netlify.app	A simplified bare-bones starter for Gatsby
-----------------------------	---	--

Get Up and Running in 5 Minutes

```
# create a new Gatsby site using the default starter
gatsby new my-blazing-fast-site
```

e.g. `gatsby new my-blazing-fast-site https://github.com/gatsbyjs/gatsby-starter-blog` or
`gatsby new my-blazing-fast-site https://github.com/gatsbyjs/gatsby-starter-hello-world`
to use a specific starter!

This will clone the starter of specified name into the folder `my-blazing-fast-site` and get you up and running in under 5 minutes with Gatsby and a fantastic starter. We can't wait to see what you build!

How to Contribute

Whether you're helping us fix bugs, improve the docs, or spread the word, we'd love to have you as part of the Gatsby community! :muscle: :purple_heart:

Check out our [Contributing Guide](#) for ideas on contributing and setup steps for getting our repositories up and running on your local machine.

Code of Conduct

Gatsby is dedicated to building a welcoming, diverse, safe community. We expect everyone participating in the Gatsby community to abide by our [Code of Conduct](#). Please read it. Please follow it. In the Gatsby community, we work hard to build each other up and create amazing things together. :muscle: :purple_heart:

A note on how this repository is organized

This repository is a [monorepo](#) managed using [Lerna](#). This means there are [multiple packages--starters!--](#) managed in this codebase that are independently versioned but co-exist within this repository.

We have set-up read-only clones of all of the [starters](#) in the official gatsbyjs organization. For example, the [default starter](#) is available as a read-only clone at [gatsbyjs/gatsby-starter-default](#). Please open PRs versus **this** repository rather than the read-only clones. Upon merge any starters that have been modified will be tagged and released.
