Page.viewport() method

Signature:

`viewport(): Viewport | null;`

Returns:

Viewport | null

- **width**: page's width in pixels
- **height**: page's height in pixels
- **deviceScalarFactor**: Specify device scale factor (can be thought of as dpr). Defaults to 1.
- **isMobile**: Whether the meta viewport tag is taken into account. Defaults to **false**.
- **hasTouch**: Specifies if viewport supports touch events. Defaults to **false**.
- **isLandscape**: Specifies if viewport is in landscape mode. Defaults to **false**.
