

Before submitting the PR, please make sure you do the following

- ☐ It's really useful if your PR references an issue where it is discussed ahead of time. In many cases, features are absent for a reason. For large changes, please create an RFC: <https://github.com/sveltejs/rfcs>
- ☐ Prefix your PR title with `[feat]`, `[fix]`, `[chore]`, or `[docs]`.
- ☐ This message body should clearly illustrate what problems it solves.
- ☐ Ideally, include a test that fails without this PR but passes with it.

Tests

- ☐ Run the tests with `npm test` and lint the project with `npm run lint`
