

`antd` is built to implement [a set of high-quality React UI components](#) which follow Ant Design specification. It is impossible to include all useful components in one package, so we also recommend that using other great third-party libraries in React community.

Category	Recommended Components
Visualization and charts	Ant Design Charts AntV Data Visualization
React Hooks Library	ahooks
React Form Library	ProForm Formily react-hook-form formik
Router	react-router
Layout	react-grid-layout react-grid-system rc-dock
Drag and drop	dnd-kit react-beautiful-dnd react-dnd react-sortable-hoc
Code Editor	react-codemirror2 react-monaco-editor
Rich Text Editor	react-quill braft-editor
JSON Viewer	react-json-view
Color Picker	react-color
Media Query	react-responsive react-media
Copy to clipboard	react-copy-to-clipboard
Document head manager	react-helmet react-helmet-async
Icons	react-fontawesome react-icons
QR Code	qrcode.react
Top Progress Bar	nprogress
i18n	FormatJS react-i18next
Code highlight	react-syntax-highlighter
Markdown renderer	react-markdown
Infinite Scroll	rc-virtual-list react-infinite-scroll-component
Map	react-google-maps google-map-react react-amap
Video	react-player video-react video.js
Context Menu	react-contextmenu react-contexify
Emoji	emoji-mart
Split View	react-split-pane
Image Crop	antd-img-crop react-image-crop
Trend Lines	react-sparklines

Keywords highlight	react-highlight-words
