

Home > puppeteer > Page > \$\$

Page.\$\$() method

The method runs `document.querySelectorAll` within the page. If no elements match the selector, the return value resolves to `[]`.

Signature:

```
$$<T extends Element = Element>(selector: string): Promise<Array<ElementHandle<T>>>;
```

Parameters

Parameter	Type	Description
selector	string	A selector to query page for

Returns:

`Promise<Array<ElementHandle<T>>>`

Remarks

Shortcut for `Page.mainFrame().$(selector)`.
