This is largely a bugfix and TX fee schedule release. We also hope to make 0.3.23 a quick release, to fix problems that the network has seen due to explosive growth in the past week.

Notable changes:

- Client will accept and relay TX's with 0.0005 BTC fee schedule (users still pay 0.01 BTC per kb, until next version)
- Non-standard transactions accepted on testnet
- Source code tree reorganized (prep for autotools build)
- Remove "Generate Coins" option from GUI, and remove 4way SSE miner. Internal reference CPU miner remains available, but users are directed to external miners for best hash production.
- IRC is overflowing. Client now bootstraps to channels #bitcoin00 - #bitcoin99
- DNS names now may be used with -addnode, -connect (requires -dns to enable)

RPC changes:

- 'listtransactions' adds 'from' param, for range queries
- 'move' may take account balances negative
- 'settxfee' added, to manually set TX fee
