

zh-CN

一个基本的评论组件，带有作者、头像、时间和操作。

en-US

A basic comment with author, avatar, time and actions.

```
import React, { createElement, useState } from 'react';
import { Comment, Tooltip, Avatar } from 'antd';
import moment from 'moment';
import { DislikeOutlined, LikeOutlined, DislikeFilled, LikeFilled } from '@ant-
design/icons';

const Demo = () => {
  const [likes, setLikes] = useState(0);
  const [dislikes, setDislikes] = useState(0);
  const [action, setAction] = useState(null);

  const like = () => {
    setLikes(1);
    setDislikes(0);
    setAction('liked');
  };

  const dislike = () => {
    setLikes(0);
    setDislikes(1);
    setAction('disliked');
  };

  const actions = [
    <Tooltip key="comment-basic-like" title="Like">
      <span onClick={like}>
        {createElement(action === 'liked' ? LikeFilled : LikeOutlined)}
      <span className="comment-action">{likes}</span>
    </span>
    </Tooltip>,
    <Tooltip key="comment-basic-dislike" title="Dislike">
      <span onClick={dislike}>
        {React.createElement(action === 'disliked' ? DislikeFilled :
DislikeOutlined)}
      <span className="comment-action">{dislikes}</span>
    </span>
    </Tooltip>,
    <span key="comment-basic-reply-to">Reply to</span>,
  ];

  return (
    <Comment
      actions={actions}
    />
  );
};
```

```

author={<a>Han Solo</a>}
avatar={<Avatar src="https://joeschmoe.io/api/v1/random" alt="Han Solo" />}
content={
  <p>
    We supply a series of design principles, practical patterns and high
quality design
    resources (Sketch and Axure), to help people create their product
prototypes beautifully
    and efficiently.
  </p>
}
datetime={
  <Tooltip title={moment().format('YYYY-MM-DD HH:mm:ss')}>
    <span>{moment().fromNow()}</span>
  </Tooltip>
}
/>
);
};

export default () => <Demo />;

```

```

/* tile uploaded pictures */
.comment-action {
  padding-left: 8px;
  cursor: 'auto';
}

[class*='-col-rtl'] .comment-action {
  padding-right: 8px;
  padding-left: 0;
}

```
