

Bitwarden (unofficial) CLI plugin

This plugin adds completion for `rbw`, an unofficial CLI for Bitwarden.

To use it, add `rbw` to the `plugins` array in your `zshrc` file:

```
plugins=(... rbw)
```

rbwpw

The `rbwpw` function is a wrapper around `rbw`. It copies the password in the clipboard for the service you ask for and clears the clipboard 20s later. The usage is as follows:

```
rbwpw <service>
```

This plugin does not add any aliases.
