

Echoserver

This is a simple server that responds with the http headers it received.

Image versions ≥ 2.5 support IPv6. Image Versions ≥ 1.10 support HTTP2 on :8443. Image Versions ≥ 1.9 expose HTTPS endpoint on :8443. Image versions ≥ 1.4 removes the redirect introduced in 1.3. Image versions ≥ 1.3 redirect requests on :80 with `X-Forwarded-Proto: http` to :443. Image versions > 1.0 run an nginx server, and implement the echoserver using lua in the nginx config. Image versions ≤ 1.0 run a python http server instead of nginx, and don't redirect any requests.
