

Imperatively

► Examples

[next/link](#) should be able to cover most of your routing needs, but you can also do client-side navigations without it, take a look at the [documentation for next/router](#) .

The following example shows how to do basic page navigations with [useRouter](#) :

```
import { useRouter } from 'next/router'

export default function ReadMore() {
  const router = useRouter()

  return (
    <button onClick={() => router.push('/about')}>
      Click here to read more
    </button>
  )
}
```
