

zh-CN

小的用于文本加载，默认用于卡片容器级加载，大的用于**页面级**加载。

en-US

A small `Spin` is used for loading text, default sized `Spin` for loading a card-level block, and large `Spin` used for loading a **page**.

```
import { Spin, Space } from 'antd';

export default () => (
  <Space size="middle">
    <Spin size="small" />
    <Spin />
    <Spin size="large" />
  </Space>
);
```
