

Invalid webpack 5 version

Why This Error Occurred

While leveraging webpack 5 support in Next.js the minimum required version of `v5.15.0` was not met. This version is needed while leveraging webpack 5 support with Next.js as early versions are missing patches that cause unexpected behavior.

Possible Ways to Fix It

Upgrade the version of webpack 5 being used with Next.js to at least `v5.15.0` by updating your resolutions field for `webpack` in your `package.json`.
