## Page.setGeolocation() method

Sets the page's geolocation.

### Signature:

```
setGeolocation(options: GeolocationOptions): Promise<void>;
```

### Parameters

Parameter	Type	Description
options	<a href="#">GeolocationOptions</a>	

### Returns:

Promise<void>

### Remarks

NOTE: Consider using [BrowserContext.overridePermissions\(\)](#) to grant permissions for the page to read its geolocation.

### Example

```
await page.setGeolocation({latitude: 59.95, longitude: 30.31667});
```
