- Upload
 - Fix Upload transparent picture display style (#15039 by @iamkun)
- Theme
 - Add zero border (#15256 by @iamkun)

Optimization

- Chore
 - Update changelog zh-cn (#14965 by @iamkun)
 - Hide demo description when it's empty (#15014 by @ziyoung)
 - Display dev server info by default by @iamkun
 - Fix 2.6.0 changelog error (#15026 by @iamkun)
 - Update build config (#14821 by @abc3660170)
 - Add hmr (#15221 by @SimonaliaChen)
 - Use sourcemap in dev environment (#15087 by @ibufu) Docs
 - Rename variable in docs (#14602 #15003 #15094 #15105 by @liupl)
 - Fix upload doc error (#15023 by @iamkun)
 - Update Form custom validator doc (#15040 by @iamkun)
 - Update Tabs docs to display vertical tabs (#15053 by @iamkun)
 - Use eleme.cn as domain (#15139 by @ziyoung)
 - Fix Image route name (#15194 by @iamkun)
 - Remove duplicated fr translation (#15207 by @iamkun)

Breaking changes

- Rate
 - Fix decimal display support in disabled mode (#15089 by @haoranyu)
- Select
 - Use placeholder option label to set placeholder in filter mode (#14989 by @ibufu)

2.7.2

2019-04-03

Bug fixes

- Form
 - Fix auto `label-width` style (#14955 by @ziyoung)

Optimization

- Docs
 - Fix doc img link error (#14957 by @iamkun)
- Chore
 - Fix deploy mkdir error (#14952 by @iamkun)

2.7.1

2019-04-03

Bug fixes

- Select
 - Set value to null when cleared (#14322 by @aaronfulkerson)
- Input
 - Update DOM dependent values on type change (#14889 by @wacky6)
- Table
 - Make `defaultExpandAll` works when expanded column exists (#14935 by @ziyoung)
- Dialog
 - Background color can be configured (#14939 by @ziyoung)
- Form
 - `label-width` supports auto width (#14944 by @ziyoung)

Optimization

- Docs
 - Update Spanish docs (#14913 by @Gonzalo2310)
 - Add French doc for new component (#14924 by @ziyoung)
 - Optimize Tabs docs (#14938 by @ziyoung)

2.7.0

2019-03-28

New features

- Table
 - Add support tree structure data (#14632 by @ziyoung)

Bug fixes

- Tabs
 - Use primary color as boxShadow color (#14558 by @Richard-Chooooou)
 - Rerender when label changes (#14496 by @akki-jat)
- Table
 - Footer follows body cell align (#14730 by @ziyoung)
- NavMenu
 - Fix click el-submenu trigger childMenu pop again bug (#14443 by @PanJiaChen)
- Dropdown
 - Make compatible with 2.6 new v-slot syntax (#14832 by @ziyoung)
- ColorPicker
 - Fix handle error hex color string (#14793 by @iamkun)
- Tree
 - Revert pr #13349 (#14847 by @ziyoung)
- Tooltip
 - Display when initial value is true (#14826 by @ziyoung)
- Docs
 - Update cascader docs (#14442 by @panhezeng)
- Style
 - Fix media query in sm-only, md-only, lg-only (#14611 by @sinchang)

Optimization

- Chore
 - Add webpage description (#14802 by @iamkun)

2.6.3

2019-03-21

Bug fixes

- Fix Cascader demo style (#14789 by @ziyoung)
- Remove unnecessary DOM operation (#14788 by @ziyoung)
- Fix DatePicker default-value DST (#14562 by @wacky6)

2.6.2

2019-03-21

New features

- DatePicker
 - Add monthrange for type attribute (#14487 by @zxyRealm)
- i18n
 - Add Croatian locale (#14360 by @danijelh)

Bug fixes

- Input
 - Fix regression (#14572 by @wacky6)
- DatePicker
 - Fix first-day-of-week computation (#14523 by @sinchang)
 - Fix week picker's value-format (#13754 by @wacky6)
- Steps
 - Fix issue #14502 (#14596 by @sinchang)
 - Fix style with simple theme (#14610 by @sinchang)
- Docs
 - Update french doc for 2.6.1 and fix typos (#14555 by @smalesys)
 - Rename variable in Table docs (#14587 by @likwotsing)
 - Add french search index (#14565 by @iamkun)
 - Fix TimePicker page style (#14579 by @ziyoung)
 - Rename variable in Upload docs (#14593 by @liupl)
 - French translation update (#14643 by @smalesys)
 - Update Form async validator docs (#14694 by @iamkun)
 - Fix tooltip doc error (#14748 by @iamkun)
 - Fix typo (#14751 by @2bj)
 - Fix highlighting control elements for Webkit touch (#14703 by @VladG0r)

Optimization

- Chore
 - Update ci build script (#14600 by @ziyoung)
 - Update ga tracking (#14560 by @iamkun)
 - Add more ga event (#14633 by @iamkun)
 - Update discussion group (#14741 by @iamkun)

- Update test deps and conf (#14735 by @wacky6)
- Upgrade gulp (#14745 by @ziyoung)
- Use codepen to display demo & fix doc error (#14747 by @ziyoung)

2.6.1

2019-03-03

Bug fixes

- **Don't specify node version** (by @iamkun in #14546)
- Fix doc directory in `deploy-faas.sh` (by @ziyoung in #14553)
- Fix date style issue in changelog for 2.6.0 (by @island205 in #14547)
- Fix doc typo (by @wack6 in #14552)

2.6.0

2019-03-01

New features

- Timeline
 - Add timeline component (by @jikkai in #14248)
- DropdownItem
 - Add icon prop to `el-dropdown-item` (by @gabrielboliveira in #14088)
- Input
 - Add show-password props (by @phshy0607 in #13966)
- Select
 - Add slot `empty` (by @elfman in #13785)
- Autocomplete
 - Add highlight-first-item prop (by @YamenSharaf in #14269)
- l18n
 - Created Armenian locale (by @hamletbarsamyan in #14214)
- Docs
 - French translation (by @smalesys in #12153, #14418, #14434)

Optimization

- Alert
 - Update alert description default slot class (by @iamkun in #14488)
- Input
 - Update input password (by @iamkun in #14480)
- InputNumber
 - Remove unnecessary parseFloat (by @JuniorTour in #14172)
- Menu
 - Add support for `el-menu-item` without index (by @georgyfarniev in #13298)
- Table
 - Remove some html DOM operations (by @elfman in #13643)
- Upload
 - Optimize code (by @elfman in #13973)

- Popup
 - Optimize code (by @KAionro in #14413)
- Docs
 - Add more detail about how to run play mode for contribution (by @island205 in #14355)
 - Warn input as a controlled component (by @wacky6 in #14463)
 - Update Table doc (by @luguokong in #14329)
 - Update input doc (by @iamkun in #14437)
 - Update custom-theme docs (by @wangguohao in #14297)
 - Make the icon style change when hover on it (by @tuxinghuan in #14295)
- Build
 - Minimizing css and js for Element doc site (by @iamkun in #14430)
 - Speeding up webpack (by @heteach in #14484)
 - Use cli to select release version (by @heteach in #14354)
- Install stale for issue handling (by @island205 in #14392)

Bug fixes

- Menu
 - Fix subMenu focus bug when switch browser tab (by @liupl in #13976)
- MessageBox
 - Fix type definition (by @NateScarlet in #14278)
- ScrollBar
 - Prevent right button click on thumb (by @xifeiwu in #14196)
- Switch
 - Trigger form validation if value changes (by @heteach in #14426)
- Table
 - Make toggleAllSelection method an instance method (by @letanure in #14075)
- Tabs & Dropdown
 - Fix style (by @heteach in #14452)
- Tree
 - Empty-text tips are different from tables (by @ColinCll in #14331)
- Docs
 - Fix DateTimePicker format doc error (by @iamkun in #14290)
 - Spelling issue in datepicker documentation (by @helmut in #14481)
 - Fix pagination doc style (by @liuchuzhang in #14451)

Breaking changes

- Table
 - Fix params order of row events (by @jikkai in #12086)

2.5.4

2019-02-01

Bug fixes

- Build: Fix babel config issue which lead to collapse transition broken (by @island205 in #14282)

2.5.3

2019-01-31

Optimization

- Optimize code of Message (by @vok123 in #14029)
- Retire gh-pages (by @ziyoung in #14266)
- Add IssueHunt link (by @island205 in #14261)

Bug fixes

- Fix UMD module error on server side (by @island205 in #14242)
- Fix active TabBar style (by @iamkun in #14240)
- Fix Table demo code error (by @xunmeng in #14253)

2.5.2

2019-01-27

Optimization

- Docs:
 - Update ChangeLog ES 2.5.1 (by @Gonzalo2310 in #14231)

Bug fixes

- Build:
 - Delete unremoved comments in umd module `lib/index.js` (by @island205 in #14233)
 - Fix export error fired in commonjs module used in nuxt.js (by @island205 in #14232)
 - Fix 2.5.1 build issues (by @iamkun in #14228)

2.5.1

2019-01-26

Optimization

- DatePicker: highlight current month and year (by @Debiancc in #14211)
- Update 2.5.0 changelog (by @wacky6 in #14217)

Bug fixes

- Fix export issue generate by webpack upgrading (by @island205 in #14220)
- Keep 2.4.11 docs && new sub folder for 2.5+ (by @iamkun in #14222)

2.5.0

2019-01-25

New features

- DatePicker
 - Add `validate-event` attribute (by @ziyoung in #13531)
- DateTimePicker
 - `pickerOptions` support `selectableRange` option (by @eeeeeeason)
- Tag
 - Add `click` event (by @licdream in #14106)
- I18n
 - support Kyrgyz language (by @zzjframework in #14174)

Optimization

- Upgrade to webpack@4 (by @jikkai in #14173)
- Input
 - Simplify implementation, follow one-way data flow. Fix several related bugs (by @wacky6 in #13471)
- Update Axure file, add new components (by @ziyoung in #13773)

Bug fixes

- Autocomplete
 - Fix dropdown's last line being clipped (by @ziyoung in #13597)
 - Fix missing popper arrow (by @liuchuzhang in #13762)
- Carousel
 - Cleanup timer when component is destroyed (by @elfman in #13820)
- Cascader
 - Remove deprecated property of computed props (by @iamkun in #13737)

- Not displaying outline when Switch is focused, #12771
- Fixed Dropdown's style in ButtonGroup, #12819 (by @bluejfox)
- Added opened event for Dialog, #12828
- Fixed the incorrect display order of TabNav, #12846
- Fixed the problem that Tabs did not scroll to the selected tab, #12948
- Fixed the problem that the identifier does not display when the Tree node is dragged, #12854
- The validate event parameter of Form contains the validation message, #12860 (by @YamenSharaf)
- Fixed DatePicker not to verify the validity of user input time, #12898
- Fixed the problem that `render-header` attribute of Table header doesn't work, #12914

2.4.7

2018-09-14

- Fixed DatePicker not triggering form validation, #12328 #12348
- Fixed DatePicker throwing errors in multiple mode, #12347
- Fixed incorrect position of DatePicker spinner, #12415 (by @rang-ali)
- Fixed automatic filling of DatePicker input box, #12521 (by @abdallanayer)
- Fixed Input not highlighted in Cascader, #12341
- Fixed wrong order of Tabpane, #12346
- Fixed incorrect position of ColorPicker cursor, #12376 (by @cnwhy)
- Fixed the style of Submenu, #2457
- Fixed not highlighted after Submenu is selected, #12479
- Fixed incorrect values selected by Cascader, #12508 (by @huangjinjiang)
- Fixed incorrect value of Pagination input box, #12525
- Fixed order that Pagination triggers events, #12530
- Fixed Table Filter not displayed, #12539
- Fixed Tree unable to delete nodes, #12684
- Fixed height of Select Input changing in single mode, #12719
- Fixed style of FormItem label in nested Form, #12748
- Added `autocomplete` attribute for Input, deprecated `auto-complete`, #12514 (by @axetroy)
- Added slots-scope for Form to display validation information, #12715 (by @YamenSharaf)

2.4.6

2018-08-09

- Fixed Table not showing filter icon when `filters` is assigned empty array, #12165
- Fixed Menu not saving active state when `collapse` is changed, #12178 (by @elfman)
- Fixed Cascader not escaping special characters for Regexp, #12248
- Fixed disabled RadioButton showing box-shadow when clicked, #12262
- Fixed arrow key not effect when default value is `undefined` ,#12322
- Fixed query function of Select not debounced in multi mode, #12181
- Fixed query keyword of Select disappearing in multi mode, #12304
- Fixed incorrect width of Dialog when it is displayed in full screen, #12203
- Fixed incorrect display of Main on IE, #12237
- Fixed Input triggering two form validations, #12260
- Fixed adding new Tree node causing nodes to disappear, #12256
- Fixed Tree node not deleted after dragging, #12279
- Fixed Popover not visible when InputNumber focuses, #12284
- Added `popper-append-to-body` attribute for Autocomplete, #12241
- Added `sync` modifier support for Pagination's `page-size` attribute, #12281

2.4.5

2018-07-26

- Fixed Table setting `class-name` does not work for `expand` column, #12006
- Added `toggleAllSelection` method for Table, #12047
- Fixed wrong position of suffix slot when Input contains Select, #12108
- Fixed `line-height` of Option unable to set, #12120
- Fixed TimeSelect with default value of `null` could not be assigned after executing `resetField` , #12010
- Fixed keydown event which is not arrow key does not work in Tree, #12008
- Fixed parent node checked in lazy mode, #12106
- Added `includeHalfChecked` parameter for `getCheckedNodes` of Tree, #12014

2.4.4

2018-07-13

- Fixed triggering Select validation after Form resetting, #11837
- Fixed wrong position of Input `suffix` slot when `suffix` slot with `append` slot, #11951
- Fixed clearable Input still displaying the clear icon when readonly, #11967
- Fixed Tree node checked when it's disabled, #11847
- Fixed Tree's `default-checked-keys` not working, #11971
- Fixed `empty-text` not visible when Tree node filtered, #11971
- Fixed the position of oversized `empty-text` in Table, #11965
- Fixed Table row not be unhighlighted when `current-row-key` is assigned to `null` , #11866
- Fixed showing filter dropdown when `filters` is an empty array, #11864
- Fixed Radio's label does not stop event propagation, #11912

2.4.3

2018-07-03

- Fixed `allow-drop` not working properly when Tree nodes have a custom height, #11797
- Now you can pass a parameter to the `clearValidate` method of Form, specifying which FormItems' validation results need to be cleared, #11821

- Added `distinguishCancelAndClose` attribute for `MessageBox`, #11831

2.4.2

2018-06-26

- Now `class-name` and `label-class-name` of `Table` are reactive, #11626
- Fixed `Table` still highlighting clicked row when `highlight-current-row` is `false`, #11646
- Fixed a style bug of `ButtonGroup` when it has only one `round` or `circle` `Button`, #11605
- Fixed style of page size `Select` of `Pagination`, #11622
- Fixed `Menu`'s `open` method error when `collapse` is dynamically changed, #11646
- Added `activeName` and `oldActiveName` parameters to the `before-leave` hook of `Tabs`, #11713
- Fixed `Cascader` focused after outside clicked, #11588
- Fixed `Cascader` not closing when option is clicked when `change-on-select` is `true`, #11623
- Now updating `Select`'s value programmatically will trigger form validation, #11672

2.4.1

2018-06-08

- Removed `Autocomplete`'s duplicate type declaration, #11388
- Fixed `Select`'s dropdown arrow style in `FireFox` when nested in `Form`, #11427
- Fixed clear icon of `Select` still showing when the initial value is `null`, #11460
- Fixed disabled radio showing box-shadow when clicked, #11462
- Added `iconClass` attribute for `MessageBox`, #11499
- Added `stretch` attribute for `Tabs`, #11476
- Fixed rendering order issue of `TabPane` when `Tabs` is `lazy`, #11461
- Fixed `Table` not retaining current highlight row when expanded, #11464
- Fixed focusing state when `before-leave` returns a resolved promise, #11386
- Fixed disabled `Popover` still creating poppers, #11426
- Fixed `Tree`'s endless loop when a new node is added in lazy mode, #11430 (by @wangjingf)
- Added `closed` event for `Dialog`, #11490

2.4.0 Fullerene

2018-05-28

New features

- General
 - Dev tool and bundler is switched to native webpack, #11216
 - Now you can globally set the initial z-index of popups, #11257
- `Autocomplete`
 - Added `hide-loading` attribute, #11260
- `Button`
 - Now you can use the `size` attribute on circle buttons to control their sizes, #11275
- `InputNumber`
 - Added `precision` attribute, #11281
- `Tabs`
 - Added `before-leave` attribute, #11259
 - Added `lazy` attribute, #11167 (by @Kingwl)

- Table
 - Added `sort` method to manually sort the table, #11311

Bug fixes

- Input
 - Fixed an issue that causes a re-render when using the Chinese IME to quickly input text, #11235 (by @STLightner)
- Popover
 - Fixed the console error when the triggering element is Radio or Checkbox, #11265
- Breadcrumb
 - Fixed the `to` attribute not supporting dynamic update, #11286
- Upload
 - Fixed the console error when a File is resolved in the returned Promise of the `beforeUpload` method, #11297 (by @qusiba)
- Tooltip
 - Fixed arrow not positioned correctly when content is empty, #11335
- Autocomplete
 - Fixed incorrect input suggestions after deleting keyword quickly, #11323
- ColorPicker
 - Fixed `active-change` event incorrectly triggering when picker dropdown is closed, #11304
- Table
 - Fixed style error of oversized filter panel, #11314
 - Fixed currently selected row not retained when the table is sorted, #11348
- Checkbox
 - Fixed single checkbox not supporting validation, #11271
- Radio
 - Fixed disabled Radio still being selected when pressing space key, #11303
- MessageBox
 - Fixed the `el-popup-parent--hidden` class not removed when opening MessageBox in succession, #11371

2.3.9

2018-05-18

- Fixed when the source data does not have the field specified by a TableColumn's `prop` attribute, an error would occur when the mouse moves into that column's cells, #11137
- The `lockScroll` attribute of pop up components no longer adds an inline style to the parent element, but instead adds a class name, #11114
- Fixed the icon of Progress not displaying when its `status` is exception, #11172
- Fixed options' `disabled` attribute not working in filterable Cascader's filter result list, #11185
- Fixed an issue where Table's expanded row cannot be collapsed if the data source is updated after its expansion, #11186
- `setCurrentKey` of Tree now accepts `null` as its param to cancel the currently highlighted node, #11205

2.3.8

2018-05-11

- Fixed DatePicker panel jumping to the current month after picking a date in a non-current month when `type` is dates, #10973
- Fixed clearable Input still displaying the clear icon when readonly, #10912
- Fixed closing the DatePicker panel without changing the value incorrectly triggering the `change` event, #11017
- Fixed keyboard navigation not working properly when Select has grouped options, #11058
- Added `prefix` named slot for Select, #11063
- Added `clearValidate` method for FormItem, #11076
- Added `checkOnClickNode` attribute for Tree, #11111

2.3.7

2018-04-29

- Fixed Table not updating its header widths when the scroll bar disappears due to filtering, #10834
- Fixed clearable Input still showing the clear icon when its initial value is `null`, #10912
- Fixed incorrect trigger of the `active-change` event after changing ColorPicker's binding value programatically, #10903 (by @zhangbobell)
- Fixed filterable Select causing an infinite loop when navigating options using keyboard if all options are disabled, #10945

2.3.6

2018-04-21

- Fixed wrong behavior of Tree's `allow-drop` callback when `type` parameter is used, #10821
- Now you can properly enter keywords in filterable single Select in IE11, #10822
- Fixed single Select incorrectly triggering `blur` event after clicking an option, #10822

2.3.5

2018-04-20

- Fixed incorrect highlights in DatePicker panel when `type` is week, #10712
- Fixed InputNumber being empty when its initial value is 0, #10714
- Added `automatic-dropdown` attribute for Select, #10042 (by @Seebiscuit)
- Fixed disabled Rate's value still being updated by navigation keys, #10726 (by @Richard-Chooooou)
- Now DatePicker's `type` attribute can be `'dates'`, where you can pick multiple dates in one picker, #10650 (by @Mini256)
- Added `prev-click` and `next-click` events for Pagination, #10755
- Added `pager-count` attribute for Pagination, #10493 (by @chongjohn716)
- Added `type` as the 3rd param of Tree's `allow-drop` attribute callback, #10792
- Now we use ResizeObserver to detect DOM element resizing, #10779

2.3.4

2018-04-12

- Deleted duplicate `showTimeout` attribute in SubMenu's TypeScript declaration, #10566 (by @kimond)
- Now you can customize Transfer's data item using scoped slot, #10577
- Fixed clicking disabled prev and next button of Pagination still triggers `current-change` event, #10628
- Fixed Textarea displaying `undefined` in SSR when its value is not set, #10630

- Fixed disabled TabItem style when `type` is border-card, #10640
- Added `$index` as `formatter` 's fourth param of Table, #10645
- Fixed CheckboxButton not exported in TypeScript declaration, #10666

2.3.3

2018-04-04

- Added `shadow` attribute for Card, #10418 (by @YunYouJun)
- Fixed Badge being hidden when `value` is 0, #10470
- Fixed some bugs of draggable Tree, #10474 #10494
- Added `placement` for Autocomplete, #10475
- Now `default-time` attribute also works in non-range DateTimePicker, #10321 (by @RickMacTurk)
- Removed the blue outline of TabItem after the browser blurs or is minimized, #10503
- Added `popper-append-to-body` attribute for SubMenu, #10515
- Removed visual feedback when hovering on non-link BreadcrumbItem, #10551
- Fixed InputNumber's `change` event to ensure the component's binding value is updated in the event handler, #10553

2.3.2

2018-03-29

- Fixed an Autocomplete regression, #10442

2.3.1

2018-03-29

- Fixed a regression that `type` of Input is not passed down to the native input element, #10415
- Added `blur` method for Select, #10416

2.3.0 Diamond

2018-03-28

New features

- Table
 - Now `formatter` of TableColumn can be dynamically updated, #10184 (by @elfman)
 - Added `select-on-indeterminate` attribute, #9924 (by @syn-zeta)
- Menu
 - Added `collapse-transition` attribute, #8809 (by @limichange)
- Input
 - Added `select` method, #10229
 - Added `blur` method, #10356
- ColorPicker
 - Added `predefine` attribute, #10170 (by @elfman)
- Tree
 - Added `draggable`, `allow-drop` and `allow-drag` attributes, and `node-drag-start`, `node-drag-enter`, `node-drag-leave`, `node-drag-over`, `node-drag-end` and `node-drop` events, #9251 #10372 (by @elfman)

- Form
 - `validate` method now has a second parameter, containing information of form items that failed the validation, #10279
 - Added `validate` event, #10351
- Progress
 - Added `color` attribute, #10352 (by @YunYouJun)
- Button
 - Added `circle` attribute, #10359 (by @YunYouJun)

Bug fixes

- Form
 - Fixed label of `FormItem` not align with mixed Input, #10189
- Menu
 - Now collapsed Menu will only show the Tooltip when the `title` slot of `MenuItem` is set, #10193 (by @PanJiaChen)
- Pagination
 - Fixed `current-change` event wrongly triggering without user interaction, #10247
- DatePicker
 - Now the date and time value in the dropdown panel are correctly formatted based on the `format` attribute, #10174 (by @remizovv)
- Upload
 - Fixed `accept` attribute not working when `drag` is true, #10278

2.2.2

2018-03-14

- Added `clear` event for Input, #9988 (by @blackmiaool)
- Now manual input of ColorPicker supports `hsl`, `hsv` and `rgb` modes, #9991
- Fixed DatePicker not triggering `change` event when its initial value is cleared, #9986
- Now icon class related attributes of Rate support dynamic updates, #10003
- Fixed Table with fixed columns not updating its height correctly if `max-height` is set, #10034
- Now DatePicker's range mode supports reverse selection (clicking the end date, then clicking the start date), #8156 (by @earlymeme)
- Added `disabled` attribute for Pagination, #10006
- Added `after-enter` and `after-leave` events for Popover, #10047
- Fixed Select not triggering validation when user selects an option after executing `resetFields` of Form, #10105
- Fixed incorrect widths of fixed columns of Table in some cases, #10130
- Fixed MessageBox inheriting the `title` attribute of its previous instance when called without `title`, #10126 (by @Pochodaydayup)
- Added `input-size` attribute for Slider, #10154
- Added `left-check-change` and `right-check-change` events for Transfer, #10156

2.2.1

2018-03-02

- Fixed Aside, Header and Footer shrinking in some layout, #9812

- Fixed Table with a `height` attribute not rendering in SSR, #9876
- Fixed expandable Table not calculating its height when a row is expanded, #9848
- Fixed `change` event not trigger when manually typing date in DateTimePicker, #9913
- Fixed Select showing its options when the input box is right-clicked, #9894 (by @openks)
- Added `tooltip-class` attribute for Slider, #9957
- Now Select will stay focused after selection, #9857 (by @Seebiscuit)
- Added `target-order` attribute for Transfer, #9960

2.2.0 Graphite

2018-02-12

New features

- Menu
 - Added `popper-class` and `disabled` attributes for SubMenu, #9604 #9771
 - Horizontal Menu now supports multi-layered SubMenu, #9741
- Tree
 - Added `node-contextmenu` event, #9678
 - Now you can customize node template using scoped slot, #9686
 - Added `getNode`, `remove`, `append`, `insertBefore`, `insertAfter`, `getCheckedKeys`, `getHalfCheckedNodes`, `getHalfCheckedKeys` methods and `check` event, #9718 #9730
- Transfer
 - Added `clearQuery` method, #9753
- Select
 - Added `popper-append-to-body` attribute, #9782

Bug fixes

- Table
 - Fixed clicking expanding icon of an expandable row triggers `row-click` event, #9654
 - Fixed layout not update when column width is changed by user dragging, #9668
 - Fixed style issue when summary row co-exists with fixed columns, #9667
- Container
 - Fixed container components not stretching in IE11, #9655
- Loading
 - Fixed Loading not showing when the value of `v-loading` is changed to true in the `mounted` hook, #9722
- Switch
 - Fixed two native click events are triggered when Switch is clicked, #9760

2.1.0 Charcoal

2018-01-31

New features

- Cascader
 - Added `focus` and `blur` events, #9184 (by @viewweiwu)
- Table

- The `filter-method` now has a third param `column` , #9196 (by @liyanlong)
- DatePicker
 - Added `prefix-icon` and `clear-icon` attributes, #9237 (by @AdamSGit)
 - Added `default-time` attribute, #9094 (by @nighca)
 - `value-format` now supports `timestamp` , #9319 (by @wacky6)
- InputNumber
 - Now the binding value can be `undefined` , #9361
- Select
 - Added `auto-complete` attribute, #9388
- Form
 - Added `disabled` attribute, #9529
 - Added `validateOnRuleChange` attribute, #8141
- Notification
 - Added `closeAll` method, #9514

Bug fixes

- InputNumber
 - Fixed value resetting when typing decimal point, #9116
- Dropdown
 - Fixed dropdown menu incorrect positioning when the page only has a horizontal scrollbar in some browsers, #9138 (by @banzhuanmei)
- Table
 - Fixed an error in calculating number of fixed columns after the column data changes, #9188 (by @kolesoffac)
 - Fixed the border of the last column of the grouped header not properly displayed, #9326
 - Fixed incorrect positioning of table header in Safari, #9327
 - Fixed expanded row collapsing when the table data changes, #9462
 - Fixed unnecessary multiple renders in some conditions, #9426
 - Fixed column width calculation error when `width` of `TableColumn` changes, #9426
- Loading
 - Fixed Loading not hiding correctly in some conditions, #9313
- DatePicker
 - Fixed `focus` method not working in range mode, #9437
 - Fixed clicking the "now" button still selecting the current date even if it is disabled, #9470 (by @wacky6)
 - Fixed date clamping when navigating, #9577 (by @wacky6)
- Steps
 - Fixed style error in IE 11, #9454

Breaking changes

- Menu
 - The popup menu in `collapse` mode now appends directly to `body` , so that it is visible when nested in `Aside`, #9263
- Table
 - Now checking the checkboxes in multi-selection Table doesn't trigger `row-click` event, #9467

- Loading
 - The `z-index` of non-fullscreen loading mask is changed to 2000. The `z-index` of fullscreen loading mask will update dynamically with the popup components, #9522
- Dropdown
 - `show-timeout` and `hide-timeout` attributes now only works when trigger is `hover` , #9573

2.0.11

2018-01-08

- Fixed border color issue of Select when in `prepend` or `append` slot of Input, #9089
- Fixed `remove-tag` event's parameter of Select, #9090
- Added `show-timeout` and `hide-timeout` attributes for SubMenu, #8934 (by @HugoLew)
- Fixed missing Tooltip style of `show-overflow-tooltip` when Table is imported on demand, #9130
- Fixed Table column's sorting malfunctioning after `clearSort` is executed on that column, #9100 (by @zEmily)
- `i18n` config file for Czech is renamed from `cz` to `cs-CZ` , #9164

2.0.10

2017-12-29

- Fixed wrong max height calculation of Table when fixed column and summary row co-exist, #9026
- Fixed uncompiled color style of empty text in Table, #9028
- Now DatePicker only emits `change` event when value is truly changed, #9029 (by @remizovvv)
- Added `tabindex` attribute for Input, #9041 (by @dicklwm)

2.0.9 🌲

2017-12-24

- Added `before-remove` hook function for Upload, #8788 (by @firesh)
- Fixed initial value of `error` not working for FormItem, #8840
- Now Loading directive supports custom class name by assigning `element-loading-custom-class` attribute, #8826 (by @earlymeme)
- Fixed CarouselItem becoming invisible when data is asynchronously updated, #8921
- Added `renderAfterExpand` attribute for Tree, #8972

2.0.8

2017-12-12

- Added Spanish documentation
- Fixed `show-timeout` of Dropdown not working when trigger is click, #8734 (by @presidenten)
- Fixed Form validation timing for rules whose trigger is blur, #8776
- Fixed blur event of ranged DatePicker, #8784
- `format` of TimePicker now supports AM/PM, #8620 (by @firesh)

2.0.7

2017-11-29

- Fixed disabled text button style, #8570

2.0.6

2017-11-29

- Fixed style bug of Table's sorting icons, #8405
- Fixed trigger mechanism for Popover when its `trigger` is manual, #8467
- Added `prefix-icon` and `suffix-icon` attributes for Autocomplete, #8446 (by @liyanlong)
- Added `separator` attribute for Cascader, #8501
- Added `clearable` attribute for Input, #8509 (by @lbogdan)
- Added `background` attribute for Pagination, #8553

2.0.5

2017-11-17

- Fixed Popover, Tree, Breadcrumb and Cascader regression in 2.0.4, #8188 #8217 #8283
- Fixed memory leak of clickoutside directive, #8168 #8225 (by @badpunman @STLightner)
- Fixed multiple Select height when its value is cleared, #8317 (by @luciy)
- Added `collapse-tags` attribute for multiple Select to replace tags with one line of text, #8190
- Fixed high CPU consumption caused by hidden Table, #8351
- Now you can use `doLayout` method of Table to update its layout, #8351

2.0.4

2017-11-10

- Improved accessibility for Cascader, Dropdown, Message, Notification, Popover, Tooltip and Tree
- Fixed Container resize when the width of viewport decreases, #8042
- Fixed Tree's `updateKeyChildren` incorrectly deleting child nodes, #8100
- Fixed bordered CheckboxButton's height when nested in a Form, #8100
- Fixed Menu's parsing error for custom colors, #8153 (by @zhouyixiang)

2.0.3

2017-11-03

- Fixed `editable` and `readonly` attributes for ranged DatePicker, #7922
- Fixed style error of nested Tabs, #7941
- Fixed style error of the last Step of vertical Steps, #7980
- Fixed trigger timing of `current-change` event for Pagination, #7995
- Fixed unregistered Tooltip in Menu, #7995

2.0.2

2017-10-31

- Now right-clicking the buttons of InputNumber won't change its value, #7817
- `validate` method of Form can now wait for asynchronous validations before executing its callback, #7774 (by @Allenice)
- Fixed range selection of DatePicker not working in Chromium 53-57 browsers, #7838
- Fixed missing preview and delete icons of Upload when its `list-type` is picture-card, #7857
- Added `sort-by` attribute for TableColumn, #7828 (by @wangfengming)
- Fixed DatePicker sometimes displaying wrong year number when selecting the first week in week mode, #7860 (by @hh23485)
- Fixed icon style error of vertical Steps, #7891

- The hot area for node arrows in Tree is expanded, #7891

2.0.1

2017-10-28

- Fixed style error of RadioButton and CheckboxButton, #7793
- Fixed TimePicker not respond to mouse scroll in some conditions, #7811
- Fixed incomplete styles of some components when imported on demand, #7811

2.0.0 Carbon

2017-10-27

New features

- General
 - A new theme: `theme-chalk`
 - Accessibility of the following components are improved: Alert, AutoComplete, Breadcrumb, Button, Checkbox, Collapse, Input, InputNumber, Menu, Progress, Radio, Rate, Slider, Switch, Upload
 - Added TypeScript typings
 - All existing icons are redesigned. Some new icons are added
 - Added a series of breakpoint-based utility classes that hide elements when the viewport size meets certain conditions
 - Added layout components: Container, Header, Aside, Main, Footer
 - Now you can configure component sizes globally. When importing Element, you can add a global config object with a `size` prop to configure default sizes for all components.
- Button
 - Added `round` attribute. It's used for round-cornered Buttons #6643
- TimeSelect
 - Now can be navigated by `Up` and `Down`, and hitting `Enter` selects the time #6023
- TimePicker
 - Now can be navigated by arrow keys, and hitting `Enter` selects the time #6050
 - Added `start-placeholder` and `end-placeholder`. They're placeholders for the two input boxes in range mode #7169
 - Added `arrow-control` attribute to spin the time with arrows #7438
- Tree
 - Now child nodes don't render before the first expand #6257
 - Added `check-descendants` attribute. It determines if child nodes are checked when checking their parent node in `lazy` mode #6235
- Tag
 - Added `size` attribute #7203
- Datepicker
 - Now `timeFormat` can format the TimePicker when type is set to `datetimerange` #6052
 - Added `start-placeholder` and `end-placeholder`. They're placeholders for the two input boxes in range mode #7169
 - Added `value-format` attribute to customize the format of the binding value, #7367
 - Added `unlink-panels` attribute to unlink the two date panels when selecting a date range
- MessageBox
 - Added `closeOnHashChange` attribute #6043

- Added `center` attribute so that the content can be centered #7029
- Added `roundButton` attribute to display round Buttons #7029
- Added `dangerouslyUseHTMLString` attribute. When set to `true`, `message` will be parsed as HTML string* #6043
- Added `inputType` attribute to assign type for the inner input box, #7651
- Dialog
 - Added `width`, `fullscreen`, `append-to-body` attributes. Now Dialog can be nested
 - Added `center` attribute so that the content can be centered #7042
 - Added `focus-after-closed`, `focus-after-open` to improve accessibility #6511
- ColorPicker
 - Now you can type colors in the input box #6167
 - Added `size` and `disabled` attributes #7026
 - Added `popper-class` attribute #7351
- Message
 - Now color of the icons can be overridden by CSS #6207
 - Added `dangerouslyUseHTMLString` attribute. When set to `true`, `message` will be parsed as HTML string* #6207
 - Added `center` attribute so that the content can be centered #6875
- Notification
 - Added `position` attribute to configure where Notification pops up #6231
 - Added `dangerouslyUseHTMLString` attribute. When set to `true`, `message` will be parsed as HTML string* #6231
 - Added `showClose` attribute to hide the close button #6402
- Rate
 - Added `show-score` attribute to determine if current score is displayed #6295
- Tabs
 - Added `tab-position` attribute #6096
- Radio
 - Added `border` and `size` attributes #6690
- Checkbox
 - Added `border` and `size` attributes #6690
- Alert
 - Added `center` attribute so that the content can be centered #6876
- Menu
 - Added `background-color`, `text-color` and `active-text-color` attributes #7064
 - Added `open` and `close` methods to open and close SubMenu programmatically, #7412
- Form
 - Added `inline-message` attribute to determine if the validation message is displayed in inline style #7032
 - Added `status-icon` attribute to display a feedback icon when validated #7032
 - Form and FormItem now have a `size` attribute. Inner components will inherit this size if not specified on themselves, #7428
 - `validate` method will now return a promise if the callback is omitted, #7405
 - Added `clearValidate` method for clearing validating results for all form items, #7623

- Input
 - Added `suffix` and `prefix` named slots, `suffixIcon` and `prefixIcon` attributes to add contents inside the input box #7032
- Breadcrumb
 - Added `separator-class` attribute to support icons as item separators #7203
- Steps
 - Added `simple` attribute to activate simple-styled Steps #7274
- Pagination
 - Added `prev-text` and `next-text` attributes to customize texts of previous page and next page #7005
- Loading
 - Now you can customize spinner icon and background color with `spinner` and `background` prop, #7390
- Autocomplete
 - Added `debounce` attribute, #7413
- Upload
 - Added `limit` and `on-exceed` attributes to limit the amount of files, #7405
- DatePicker
 - Added `time-arrow-control` attribute to activate `arrow-control` of the nesting TimePicker, #7438
- Layout
 - Added a new breakpoint `xl` for viewport wider than 1920px
- Table
 - Added `span-method` attribute for merging cells
 - Added `clearSort` method to clear sorting programmatically
 - Added `clearFilter` method to clear filter programmatically
 - For expandable rows, when a row is expanded, a `.expanded` class will be added to its class list, so that you can customize its style
 - Added `size` attribute
 - Added `toggleRowExpansion` method to expand or collapse expandable rows programmatically
 - Added `cell-class-name` attribute to assign class name for cells
 - Added `cell-style` attribute to style cells
 - Added `header-row-class-name` attribute to assign class name for header rows
 - Added `header-row-style` attribute to style header rows
 - Added `header-cell-class-name` attribute to assign class name for header cells
 - Added `header-cell-style` attribute to style header cells
 - TableColumn's `prop` attribute now accepts `object[key]` notations
 - Added `index` attribute for TableColumn to customize row indices
- Select
 - Added `reserve-keyword` attribute for reserving current search keyword after selecting an option

Bug fixes

- DatePicker

- Fixed `v-model` returning the second day of the selected week in week mode #6038
- Fixed the first input being cleared in `daterange` type #6021
- DatePicker
 - Fixed DatePicker and TimePicker affecting each other when picked #6090
 - Fixed hour and second can be beyond limit when selecting time #6076
- TimePicker
 - Fixed `v-model` not update correctly when blurred #6023
- Dialog
 - Fixed texts having blurry edges when opening and closing nesting dropdowns #6088
- Select
 - Improved performance. Now Vue dev-tool won't crash when a large number of Selects are destroyed #6151
- Table
 - Fixed a bug that Table remains hiding when its parent element appears from `display: none`
 - Fixed Table expanding its width when its parent element has `display: flex`
 - Fixed a bug that fixed columns of a Table with `append` slot would disappear when data is dynamically fetched
 - Fixed `expand-row-keys` attribute not working with initial value
 - Fixed filter failing when `data` updates
 - Fixed a calculation error of fixed columns layout with grouped headers
 - Fixed a dynamic `max-height` bug
 - Fixed some style calculation errors

Breaking changes

- General
 - Removed `theme-default`
 - Compatible with Vue 2.5.2+ and IE 10+
 - `change` event of form components and `current-change` event of Pagination now only trigger on user interaction
 - `size` attribute of Button and form components now accept `medium`, `small` and `mini`
 - To facilitate the use of third-party icons, `icon` attribute of Button and Steps, `prefix-icon` and `suffix-icon` attributes of Input now require a full class name
- Dialog
 - Removed `size` attribute. Now the size of Dialog can be configured by `width` and `fullscreen`
 - Now the visibility of Dialog cannot be controlled by `v-model`
- Rate
 - `text-template` is renamed to `score-template`
- Dropdown
 - `menu-align` is renamed to `placement`. Now it supports more positions
- Transfer
 - `footer-format` is renamed to `format`
- Switch
 - Attributes starting with `on-*` will be parsed to events in JSX, making all `on-*` attributes of Switch not able to work in JSX. So `on-*` attributes are renamed to `active-*`, and accordingly

- `off-*` attributes are renamed to `inactive-*`. This change affects the following attributes:
`on-icon-class`, `off-icon-class`, `on-text`, `off-text`, `on-color`, `off-color`,
`on-value`, `off-value`
- `active-text` and `inactive-text` attributes now don't have default values
 - Tag
 - `type` attribute now accepts `success`, `info`, `warning` and `danger`
 - Menu
 - Removed `theme` attribute. The color of Menu can be configured using `background-color`, `text-color` and `active-text-color`
 - Input
 - Removed `icon` attribute. Now the suffix icon can be configured using `suffix-icon` attribute or `suffix` named slot
 - Removed `on-icon-click` attribute and `click` event. Now to add click handler on icons, please use named slots
 - `change` event now behaves like the native input element, which triggers only on blur or pressing enter. If you need to respond to user input in real time, you can use `input` event.
 - Autocomplete
 - Removed `custom-item` attribute. Now the template of input suggestions can be customized using `scoped slot`
 - Removed `props` attribute. Now you can use `value-key` attribute to designate key name of the input suggestion object for display
 - Steps
 - Removed `center` attribute
 - Now the Steps will fill its parent container by default
 - DatePicker
 - The params of DatePicker's `change` event is now the binding value itself. Its format is controlled by `value-format`
 - Table
 - Removed support for customizing column template using `inline-template`
 - `sort-method` now aligns with `Array.sort`. It should return a number instead of a boolean
 - `append` slot is moved outside the `tbody` element to avoid multiple rendering
 - `expand` event is renamed to `expand-change`
 - The params of `row-class-name` and `row-style` method is now an object

* Dynamically rendering arbitrary HTML on your website can be very dangerous because it can easily lead to [XSS attacks](#). So when `dangerouslyUseHTMLString` is on, please make sure the content of `message` is trusted, and **never** assign `message` to user-provided content.
