   -
     - int fd
     - File descriptor returned by a previous call to open().
   -
     - audio_stream_source_t source
     - Indicates the source that shall be used for the Audio stream.
```

Description

This ioctl call informs the audio device which source shall be used for the input data. The possible sources are demux or memory. If AUDIO_SOURCE_MEMORY is selected, the data is fed to the Audio Device through the write command.

Return Value

On success 0 is returned, on error -1 and the `errno` variable is set appropriately. The generic error codes are described at the [ref:Generic Error Codes <gen-errors>](#) chapter.
