

Home > puppeteer > Page > setGeolocation

Page.setGeolocation() method

Sets the page's geolocation.

Signature:

```
setGeolocation(options: GeolocationOptions): Promise<void>;
```

Parameters

Parameter	Type	Description
options	GeolocationOptions	

Returns:

Promise<void>

Remarks

NOTE: Consider using `BrowserContext.overridePermissions()` to grant permissions for the page to read its geolocation.

Example

```
await page.setGeolocation({latitude: 59.95, longitude: 30.31667});
```
