

Rewriting to Auto Export or Fallback Dynamic Route

Why This Error Occurred One of your rewrites in your `next.config.js` point to a dynamic route that is automatically statically optimized or is a fallback SSG page.

Rewriting to these pages are not yet supported since rewrites are not available client-side and the dynamic route params are unable to be parsed. Support for this may be added in a future release.

Possible Ways to Fix It For fallback SSG pages you can add the page to the list of prerendered paths.

For static dynamic routes, you will currently need to either rewrite to non-dynamic route or opt the page out of the static optimization with `getServerSideProps`
