

Example application using `joi` and `next-joi`

This example shows how to validate Next.js API routes by using the `joi` and `next-joi` packages. It contains samples for both API routes using a [Connect middleware](#) (see `/api/people`) and regular API routes (see `/api/cars`).

Deploy your own

Deploy the example using [Vercel](#):

How to use

Execute `create-next-app` with [npm](#) or [Yarn](#) to bootstrap the example:

```
npx create-next-app --example with-joi with-joi-app
# or
yarn create next-app --example with-joi with-joi-app
# or
pnpm create next-app -- --example with-joi with-joi-app
```

Deploy it to the cloud with [Vercel](#) ([Documentation](#)).
