

## zh-CN

迷你版的步骤条，通过设置 `<Steps size="small">` 启用.

## en-US

By setting like this: `<Steps size="small">` , you can get a mini version.

```
import { Steps } from 'antd';

const { Step } = Steps;

export default () => (
  <Steps size="small" current={1}>
    <Step title="Finished" />
    <Step title="In Progress" />
    <Step title="Waiting" />
  </Steps>
);
```
