

Gatsby example

How to use

Download the example or clone the repo:

```
curl https://codeload.github.com/mui/material-ui/tar.gz/master | tar -xv --strip=2 material-ui
cd gatsby
```

Install it and run:

```
npm install
npm run develop
```

The idea behind the example

The project uses Gatsby, which is a static site generator for React. It includes `@mui/material` and its peer dependencies, including `emotion`, the default style engine in MUI v5. If you prefer, you can use `styled-components` instead.

What's next?

You now have a working example project. You can head back to the documentation, continuing browsing it from the templates section.
