

next-translate example

This is an example of using [next-translate](#) in a Next.js project.

Deploy your own

Deploy the example using [Vercel](#) or preview live with [StackBlitz](#)

How to use

Execute [create-next-app](#) with [npm](#) or [Yarn](#) to bootstrap the example:

```
npx create-next-app --example with-next-translate with-next-translate-app
# or
yarn create next-app --example with-next-translate with-next-translate-app
# or
pnpm create next-app -- --example with-next-translate with-next-translate-app
```

Deploy it to the cloud with [Vercel](#) ([Documentation](#)).

Notes

This example is a basic starting point for using [next-translate](#) with Next.js. It's a tool to translate Next.js applications respecting the [Automatic Static Optimization](#). Deploy static sites with full i18n support!
