

Home > puppeteer > Browser > version

Browser.version() method

A string representing the browser name and version.

Signature:

```
version(): Promise<string>;
```

Returns:

Promise<string>

Remarks

For headless Chromium, this is similar to **HeadlessChrome/61.0.3153.0**. For non-headless, this is similar to **Chrome/61.0.3153.0**.

The format of `browser.version()` might change with future releases of Chromium.
