

Invalid styled-jsx children

Why This Error Occurred You have passed invalid children to a `<style jsx>` tag.

Possible Ways to Fix It Make sure to only pass one child to the `<style jsx>` tag, typically a template literal.

```
const Component = () => (  
  <div>  
    <p>Red paragraph</p>  
    <style jsx>{`  
      p {  
        color: red;  
      }  
    `}</style>  
  </div>  
)
```
