

# Example app with Mocha tests

This example features an app with Mocha tests.

## Deploy your own

Deploy the example using [Vercel](#) or preview live with [StackBlitz](#)

## How to use

Execute [create-next-app](#) with [npm](#) or [Yarn](#) to bootstrap the example:

```
npx create-next-app --example with-mocha with-mocha-app
# or
yarn create next-app --example with-mocha with-mocha-app
# or
pnpm create next-app -- --example with-mocha with-mocha-app
```

## Run Mocha tests

```
npm run test
# or
yarn test
```

A very important part of this example is the `.babelrc` file which configures the `test` environment to use `babel-preset-env` and configures it to transpile modules to `commonjs` ). [Learn more](#).
