

## zh-CN

评论可以嵌套。

## en-US

Comments can be nested.

```
import { Comment, Avatar } from 'antd';

const ExampleComment = ({ children }) => (
  <Comment
    actions={ [<span key="comment-nested-reply-to">Reply to</span>] }
    author={ <a>Han Solo</a> }
    avatar={ <Avatar src="https://joeschmoe.io/api/v1/random" alt="Han Solo" /> }
    content={
      <p>
        We supply a series of design principles, practical patterns and high quality
        design
        resources (Sketch and Axure).
      </p>
    }
  >
    {children}
  </Comment>
);

export default () => (
  <ExampleComment>
    <ExampleComment>
      <ExampleComment />
      <ExampleComment />
    </ExampleComment>
  </ExampleComment>
);
```
