

sm501fb

Configuration:

You can pass the following kernel command line options to sm501 videoframebuffer:

```
sm501fb.bpp=    SM501 Display driver:  
                Specify bits-per-pixel if not specified by 'mode'  
  
sm501fb.mode=   SM501 Display driver:  
                Specify resolution as  
                "<xres>x<yres>[-<bpp>][@<refresh>]"
```
