Edit a field override

Edit a field override when you want to make changes to an override setting.

Before you begin

- [Add a panel to a dashboard]({{< relref “../working-with-panels/add-panel.md” >}}).
- [Add a field override]({{< relref “../override-field-values/add-a-field-override.md” >}}).

To edit a field override:

1. Edit the panel that contains the overrides you want to edit.
2. In the panel display options, click the **Overrides** tab.
3. Locate the override that you want to change.
4. Perform any of the following:
 - Edit settings on existing overrides or field selection parameters.
 - Delete existing override properties by clicking the **X** next to the property.
 - Add an override properties by clicking **Add override property**.
