

## Autoenv plugin

This plugin loads the Autoenv.

To use it, add `autoenv` to the `plugins` array in your `zshrc` file:

```
plugins=(... autoenv)
```

## Functions

- `use_env()`: creates and/or activates a virtualenv. For use in `.env` files. See the source code for details.

## Requirements

In order to make this work, you will need to have the `autoenv` installed.

More info on the usage and install at the project's homepage.
