

zh-CN

使用 `status` 为 `InputNumber` 添加状态, 可选 `error` 或者 `warning`。

en-US

Add status to `InputNumber` with `status`, which could be `error` or `warning`.

```
import { InputNumber, Space } from 'antd';
import ClockCircleOutlined from '@ant-design/icons/ClockCircleOutlined';

const ValidateInputs: React.FC = () => (
  <Space direction="vertical" style={{ width: '100%' }}>
    <InputNumber status="error" style={{ width: '100%' }} />
    <InputNumber status="warning" style={{ width: '100%' }} />
    <InputNumber status="error" style={{ width: '100%' }} prefix=
  {<ClockCircleOutlined />} />
    <InputNumber status="warning" style={{ width: '100%' }} prefix=
  {<ClockCircleOutlined />} />
  </Space>
);

export default () => <ValidateInputs />;
```
