

Prerequisites

Please answer the following questions for yourself before submitting an issue.

- ☐ I am using the latest TensorFlow Model Garden release and TensorFlow 2.
- ☐ I am reporting the issue to the correct repository. (Model Garden official or research directory)
- ☐ I checked to make sure that this issue has not already been filed.

1. The entire URL of the file you are using

[https://github.com/tensorflow/models/tree/master/research/...](https://github.com/tensorflow/models/tree/master/research/)

2. Describe the bug

A clear and concise description of what the bug is.

3. Steps to reproduce

Steps to reproduce the behavior.

4. Expected behavior

A clear and concise description of what you expected to happen.

5. Additional context

Include any logs that would be helpful to diagnose the problem.

6. System information

- OS Platform and Distribution (e.g., Linux Ubuntu 16.04):
- Mobile device name if the issue happens on a mobile device:
- TensorFlow installed from (source or binary):
- TensorFlow version (use command below):
- Python version:
- Bazel version (if compiling from source):
- GCC/Compiler version (if compiling from source):
- CUDA/cuDNN version:
- GPU model and memory:
