

zh-CN

在 4.0 之后，危险成为一种按钮属性而不是按钮类型。

en-US

`danger` is a property of button after antd 4.0.

```
import { Button } from 'antd';

export default () => (
  <>
    <Button type="primary" danger>
      Primary
    </Button>
    <Button danger>Default</Button>
    <Button type="dashed" danger>
      Dashed
    </Button>
    <Button type="text" danger>
      Text
    </Button>
    <Button type="link" danger>
      Link
    </Button>
  </>
);
```
