

zh-CN

表头只支持列合并，使用 `column` 里的 `colSpan` 进行设置。

表格支持行/列合并，使用 `render` 里的单元格属性 `colSpan` 或者 `rowSpan` 设置为 0 时，设置的表格不会渲染。

en-US

Table column title supports `colSpan` that set in `column`.

Table cell supports `colSpan` and `rowSpan` that set in `render` return object. When each of them is set to 0, the cell will not be rendered.

```
import { Table } from 'antd';

// In the fifth row, other columns are merged into first column
// by setting it's colSpan to be 0
const sharedOnCell = (_, index) => {
  if (index === 4) {
    return { colSpan: 0 };
  }
};

const columns = [
  {
    title: 'Name',
    dataIndex: 'name',
    render: (text, row, index) => <a>{text}</a>,
    onCell: (_, index) => ({
      colSpan: index < 4 ? 1 : 5,
    }),
  },
  {
    title: 'Age',
    dataIndex: 'age',
    onCell: sharedOnCell,
  },
  {
    title: 'Home phone',
    colSpan: 2,
    dataIndex: 'tel',
    onCell: (_, index) => {
      if (index === 2) {
        return { rowSpan: 2 };
      }
      // These two are merged into above cell
      if (index === 3) {
        return { rowSpan: 0 };
      }
      if (index === 4) {
        return { colSpan: 0 };
      }
    }
  }
];
```

```
    },
  },
  {
    title: 'Phone',
    colSpan: 0,
    dataIndex: 'phone',
    onCell: sharedOnCell,
  },
  {
    title: 'Address',
    dataIndex: 'address',
    onCell: sharedOnCell,
  },
],
];
