

## regenerator-runtime

Standalone runtime for Regenerator-compiled generator and **async** functions.

To import the runtime as a module (recommended), either of the following import styles will work:

```
// CommonJS  
const regeneratorRuntime = require("regenerator-runtime");
```

```
// ECMAScript 2015  
import regeneratorRuntime from "regenerator-runtime";
```

To ensure that `regeneratorRuntime` is defined globally, either of the following styles will work:

```
// CommonJS  
require("regenerator-runtime/runtime");
```

```
// ECMAScript 2015  
import "regenerator-runtime/runtime";
```

To get the absolute file system path of `runtime.js`, evaluate the following expression:

```
require("regenerator-runtime/path").path
```
