

## zh-CN

使用 `status` 为 `Transfer` 添加状态, 可选 `error` 或者 `warning` 。

## en-US

Add status to `Transfer` with `status`, which could be `error` or `warning` .

```
import React from 'react';
import { Transfer, Space } from 'antd';

const Status = () => (
  <Space direction="vertical">
    <Transfer status="error" />
    <Transfer status="warning" showSearch />
  </Space>
);

export default () => <Status />;
```
