

# Ansible documentation

This project hosts the source behind the general pages of [docs.ansible.com](https://docs.ansible.com). Module-specific documentation is hosted in the various collections repositories. See [Ansible Galaxy](#), the list of [Ansible-maintained collections](#), and the [ansible-collections organization](#) for collections sources.

To create clear, concise, and consistent contributions to Ansible documentation, please refer to the following information.

## Contributions

Contributions to the documentation are welcome.

The Ansible community produces guidance on contributions, building documentation, and submitting pull requests, which you can find in [Contributing to the Ansible Documentation](#).

You can also join the [Docs Working Group](#) and/or the `#ansible-docs` IRC channel on [irc.libera.chat](#)

## Ansible style guide

Ansible documentation is written in ReStructuredText(RST). The [Ansible style guide](#) provides linguistic direction and technical guidelines for working with reStructuredText, in addition to other resources.

## Tools

The Ansible community uses a range of tools and programs for working with Ansible documentation. Learn more about [Other Tools and Programs](#) in the Ansible Community Guide.

## GitHub

[Ansible documentation](#) is hosted on the Ansible GitHub project and various collection repositories, especially those in the [ansible-collections organization](#). For general GitHub workflows and other information, see the [GitHub Guides](#).
