

## **Troubleshooting**

### **Toggle isn't working after install**

Make sure you restarted Firefox or Thunderbird, and either restarted Chrome/Safari/Opera or reloaded your webmail page.

### **No syntax highlighting**

Switch your “Syntax Highlighting CSS” theme in the MDH Options.

syntax highlighting theme change

### **Getting the latest Primary Styling CSS**

MDH doesn't automatically update your Primary Styling CSS if the default changes (issue #48), so you'll need to manually reset it.

primary styling css reset

### **Signature getting rendered**

See the Tips and Tricks entry.

## **Reporting and Debugging**

### **Copying HTML**

**Chrome**   copy html in Chrome

**Firefox**

### **Inspecting background scripts**

**Chrome**   inspect background scripts in Chrome
