

## Color

Element utiliza un conjunto de paletas para especificar colores, y así, proporcionar una apariencia y sensación coherente para los productos que construye.

### Color principal

El color principal de Element es el azul brillante y amigable.

```
<el-row :gutter="12"> <el-col :span="10" :xs="{span: 12}"> <div
class="demo-color-box" :style="{ background: primary }" > Brand Color
```

#409EFF

```
<div
  class="bg-color-sub"
  :style="{ background: tintColor(primary, 0.9) }"
>
<div
  class="bg-blue-sub-item"
  v-for="(item, key) in Array(8)"
  :key="key"
  :style="{ background: tintColor(primary, (key + 1) / 10) }"
  >
</div>
</div>
</div>
```

### Color secundario

Además del color principal, se necesitan utilizar distintos colores para diferentes escenarios (por ejemplo, el color en tono rojo indica una operación peligrosa).

```
<el-row :gutter="12"> <el-col :span="6" :xs="{span: 12}"> <div class="demo-
color-box" :style="{ background: success }" >Success
```

#67C23A

```
<div
  class="bg-color-sub"
>
  <div
    class="bg-success-sub-item"
    v-for="(item, key) in Array(2)"
    :key="key"
    :style="{ background: tintColor(success, (key + 8) / 10) }"
    >
  </div>
</div>
</div>
```

```
<el-col :span="6" :xs="{span: 12}"> <div class="demo-color-box" :style="{
background: warning }" >Warning
```

#E6A23C

```
  <div
    class="bg-color-sub"
  >
    <div
      class="bg-success-sub-item"
      v-for="(item, key) in Array(2)"
      :key="key"
      :style="{ background: tintColor(warning, (key + 8) / 10) }"
    >
    </div>
  </div>
</div>
```

```
<el-col :span="6" :xs="{span: 12}"> <div class="demo-color-box" :style="{
background: danger }" >Danger
```

#F56C6C

```
  <div
    class="bg-color-sub"
  >
    <div
      class="bg-success-sub-item"
      v-for="(item, key) in Array(2)"
      :key="key"
      :style="{ background: tintColor(danger, (key + 8) / 10) }"
    >
    </div>
  </div>
</div>
```

```
<el-col :span="6" :xs="{span: 12}"> <div class="demo-color-box" :style="{
background: info }" >Info
```

#909399

```
  <div
    class="bg-color-sub"
  >
    <div
      class="bg-success-sub-item"
      v-for="(item, key) in Array(2)"
      :key="key"
      :style="{ background: tintColor(info, (key + 8) / 10) }"
    >
    </div>
  </div>
```

```

    </div>
  </div>
</div>

```

## Color neutro

Los colores neutrales son para texto, fondos y bordes. Puede usar diferentes colores neutrales para representar una estructura jerárquica.

```

<el-row :gutter="12"> <el-col :span="6" :xs="{span: 12}">

  <div class="demo-color-box demo-color-box-other"
    :style="{ background: textPrimary }">
    >Texto primario<div class="value">{{textPrimary}}</div></div>
    <div class="demo-color-box demo-color-box-other"
      :style="{ background: textRegular }">
      >
      Texto regular<div class="value">{{textRegular}}</div></div>
      <div class="demo-color-box demo-color-box-other"
        :style="{ background: textSecondary }">
        >Texto secundario<div class="value">{{textSecondary}}</div></div>
        <div class="demo-color-box demo-color-box-other"
          :style="{ background: textPlaceholder }">
          >Texto de placeholder<div class="value">{{textPlaceholder}}</div></div>
        </div>
      </div>
    <el-col :span="6" :xs="{span: 12}">

      <div class="demo-color-box demo-color-box-other demo-color-box-lite"
        :style="{ background: borderBase }">
        >Borde base<div class="value">{{borderBase}}</div></div>
        <div class="demo-color-box demo-color-box-other demo-color-box-lite"
          :style="{ background: borderLight }">
          >Borde ligero<div class="value">{{borderLight}}</div></div>
          <div class="demo-color-box demo-color-box-other demo-color-box-lite"
            :style="{ background: borderLighter }">
            >Borde claro<div class="value">{{borderLighter}}</div></div>
            <div class="demo-color-box demo-color-box-other demo-color-box-lite"
              :style="{ background: borderExtraLight }">
              >Borde extra claro<div class="value">{{borderExtraLight}}</div></div>
            </div>
          </div>
        <el-col :span="6" :xs="{span: 12}">

          <div
            class="demo-color-box demo-color-box-other"
            :style="{ background: black }">
            >Basic Black<div class="value">{{black}}</div></div>
          <div>

```

```
class="demo-color-box demo-color-box-other"
:style="{ background: white, color: '#303133', border: '1px solid #eee' }"
>Basic White<div class="value">{{white}}</div></div>
<div class="demo-color-box demo-color-box-other bg-transparent">Transparent<div class="va
</div>
</div>
```
